# Environmental Policy

Global Logistics Providers GLP is conscious of the fact that our business goals have to be respectful of the environment and supporting a long-term environmental policy.

Therefore the economical use of energy and raw materials is a component of our business policy as is the protection of water, ground and air resources. GLP continuously strives to have their operational plans and processes comply with the law and improve environment. For these reasons, we see a cautious and respectful approach to the environment as an essential factor in reaching our business goals. We are therefore committed to the following environmental guidelines:

- **Environmental Protection** Environmental protection is an essential part of our business policy
- **Services** We strive to use environmentally friendly methods for consumption and disposal of materials when performing our services
- **Continual Improvement** Through a process of continuous improvement in all business areas we will constantly increase the environmental compatibility of our services. The compliance of the legal provisions is standard.
- **Competence** Environmental protection is a leadership responsibility. We support the creativity of our employees by informing, educating and motivating them so that they can deal competently and responsibly with the interpretation of the environmental guidelines.
- **Contracting** The importance of environmental policy shall be communicated and trained to all subcontractors and partners to ensure alignment of corporate policy.
